

LIVINGVOICE

Auditorium II

The Auditorium loudspeaker reproduces music with believable scale and dynamic contrast. The vivid, engaging presentation captures the life and immediacy of the concert hall. Complex, heavily figured passages are reproduced without the characteristic congestion of many of today's high-end designs. A large, coherent picture is painted with confidence and freedom whilst the fine low-level resolution develops tonal shade and colour to the fullest and most natural extent.

Technical Summary

750 density hardwood composite enclosure
Components matched to two decimal places
High sensitivity D'Appolito configuration
Non-inductive wire wound resistors
Book matched premium veneers
Hand wound air core inductors
Mechanically isolated crossover
Optimised crossover layout

Specification

Sensitivity	94 dB
Dimensions h/w/d	1040 / 220 / 280 mm
Frequency Response	35 Hz - 22.5 kHz
Gross Weight	17 kg per unit
Nominal Impedance	6 ohms
Loading	Reflex port
Power handling	100 watts

Choice of veneers

	
<p style="text-align: center;">Cherry</p>	<p style="text-align: center;">European Maple</p>
	
<p style="text-align: center;">Walnut</p>
