

Main Range Support Systems Stands Unique

6mm Supports and Cabinets

The TV, Sound and Tower Supports are part of the *Unique* Collection. Classic Materials combined with contemporary design; result in elegance unparalleled by alternative systems.

- **Quality** is a keynote in all *Unique* Products. The Sound Support Systems are manufactured from solid kiln dried ash hardwood, brass, steel and polished toughened glass; designed to last for life.
- **Unique Flexibility** is reflected in the systems intermediate shelves that may be adjusted to the nearest 25mm. These systems are totally *Unique*, the shelf spacing may be altered and the number of shelves increased or decreased to suit the equipment being used.
- **Sound dynamics**, focus and scale are essential requirements of any audio system. Your hi-fi performance is enhanced by the system's rigid fixings and silicone isolated shelves that both isolate and absorb vibration.

Mahogany Sound Support and Natural Cherry Sound Tower

A complete suite of products for your living room.

Available in many finishes all systems use height adjustable spikes with an option of a silicon foot for delicate floors. The option of a separate glass isolation platform is recommended for use with high quality CD players or Turntables, as this further 'energy manages' the sources from vibration and thus improves sound quality. Carbon Fibre Isolator feet are available to the connoisseur.

WHAT HI-FI? **BEST OVERALL SUPPORT - Sound Tower**
 "For ease of use, quality of sound and it's reasonable price, this is a winner."

10mm Supports & Cabinets

The TV 10, Sound 10 and Tower 10 Supports are a significant enhancement to the Main Unique Range. All models feature 10mm glass throughout providing an even more effective and substantial isolation environment. Each shelf will support 500 Kg even load.

10mm Supports and Cabinets with Chunky Legs

With over twice the quantity of hardwood these stands offer more substantial proportions. (Standard leg 45mm x 45mm - Chunky Leg 60mm x 60mm).

10mm Extended Glass

Visually Impressive supports that are designed to accommodate the largest equipment.

Compact Supports

An attractive solution for full size equipment where space is at a premium - this product is only available in 10mm glass.

Energy Management

Floor Slabs and **Isolation Platforms** are available utilizing 10mm polished glass and independent levelling spikes. Additional isolation can seriously improve the sonic performance of your equipment.

HI-FI CHOICE *"They have most effect with amplifiers, produce a tighter, more authoritative sound (enhanced when more isolators are placed between layers of glass on which the components rest, so you can upgrade forever...)"*

Carbon Fibre Isolation is recommended under each shelf and under each piece of equipment.

Placed in sets of 3 under items of Hi-Fi equipment, these Unique isolators provide a substantial upgrade to all CD players, Turntables, Amplifiers, and Tape Decks. When used under Power Amplifiers & Loudspeakers, sound staging becomes much more realistic and convincing. The equipment is automatically levelled by the Unique design of the Carbon Fibre Isolator. Very stable, they may be used to support equipment up to 50kg in weight. (The Isolators work on all surfaces and in particular, glass shelves). When used with tiers of glass shelves, isolation properties improve very noticeably.

WHAT HI-FI? *June 96 - "A simple and inexpensive tweak that can add authority and improve separation"*

WHAT HI-FI? *October 95 - "Sonically, they provide a substantial boost to stereo imagery and fine detail. Musically they rock!"*

Shelf Support Upgrades are an instant upgrade to transform any existing Stands Unique support with stunning results. Comprised of a set of four Carbon Fibre Isolators, precision machined brass inserts with height adjustable spikes and lock-nuts - they replace the existing brass inset shelf supports.
