Pure Carbon

Minimalist high performance Carbon Fibre supports

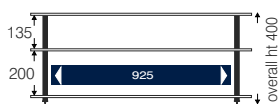

Audiophile performance - These supports will improve video and sonic performance. Sleek minimalist looks with incredible rigidity, strength and the natural beauty of carbon fibre. 10mm toughened safety glass is used from our other ranges along with pre-tensioned carbon fibre uprights and stainless steel fixings. Either system can be increased in height by adding extra standard structural glass and a set of carbon fibre uprights. Standard leg heights are offered at 135mm and 200mm. Custom heights are available, please call for details and prices for other sizes of glass, eg: Extended (770 x 570mm) and Compact (640 x 420mm).

"Sonically they provide a substantial boost to stereo imagery and fine detail. Musically they rock!"
Carbon Fibre Isolators Hi-Fi Choice

"Producing a tighter and more authoritative sound - which can be enhanced even more when isolators are placed between the layers of glass on which components rest, enabling you to upgrade forever."

Carbon Fibre Isolators - The Ultimate Hi-Fi & Home Cinema Guide

Energy Management

Carbon Fibre Isolators

Performance guaranteed. A set of three Carbon Fibre discs with brass spiked cones for use under any piece of equipment. They bypass the existing feet allowing the damaging energy within the equipment to be transferred and filtered through the Carbon onto a high frequency interface. They may be small but the benefits are truly remarkable. The best value sonic upgrade on the market. Highly recommended.

Overall Height 13mm
